Preparing the clinical nurse specialist. Cooperative educational experiences. Increasing demands of care have been associated with decreased availability of nursing educators in oncology. Clinical nurse specialists are prepared for this new work role, and their role in resident education is important. This article presents four case reports involving clinical nurse specialists' educational experiences. The responsibilities of a CNS in the acute oncology area and the benefits that a CNS can provide are discussed. The results of a survey of CNSs' perception of their role in preparing residents are presented.

Q: UIWebView Element doesn't present inside ScrollView I have an UIWebView element inside of ScrollView element. Initially I didn't have any problems but as soon as I added this element to the code it doesn't show up on iPhone 4 simulator. I tried to put it on a separate view and use scroll view for the whole screen (i.e. scrollView.bounces=false) and it still doesn't show up. This element exists on iPhone 4.5 simulator. Is there a way to show it on iPhone 4? Please help me with this.

---

A: It's a bug in iOS 5.1, sometimes it bugs out and the position of the webView is misaligned. I've found a workaround. If there's a way to fix it, I'd love to hear it. - (void) viewDidLoad { [super viewDidLoad]; // Do any additional setup after loading the view, typically from a nib. [self.webView setBackgroundColor:[UIColor clearColor]]; self.webView.bounces = YES; } - (void) scrollViewDidScroll:(UIScrollView \*)scrollView { CGFloat y = scrollView.contentOffset.y;
